

DIGITAL GUARDIAN®

For Compliance

Digital Guardian for Compliance suite enables companies to effectively discover, monitor, control, and secure sensitive data, whether on the network, in use on desktops or laptops, at rest on end-user devices and network servers, or stored in the cloud.

Our approach is recognized for delivering the lowest total cost of ownership with no dedicated resources required to manage. It utilizes our Data Base Record Matching technology that is the industry's most accurate for identifying and controlling structured data types such as, PHI, and PCI. By focusing on protecting PII, we provide hospitals, banks and other organizations with the lowest false positive rate of any technology available.

The Digital Guardian (DG) for Compliance suite includes DG for Data Discovery, DG for Network DLP, DG for Cloud Data Protection and DG for Endpoint Compliance. The entire solution is available either on-premises or delivered via a Managed Security Program.

> DIGITAL GUARDIAN FOR COMPLIANCE SUITE

Cloud Data Protection

Network Data Protection

Data Discovery

Endpoint Compliance

> DG FOR NETWORK DLP

PREVENT NETWORK DATA LOSS

BENEFITS

- Enable secure business processes
- Support secure data communications and compliance
 - Email, Webmail, Web apps
 - HTTP/S, FTP/S, TCP/IP
- Educate users with real-time prompts
- Log violations for administrators

Deploy

Inspect

Remediate

Web, File, Database Servers +more

> DG FOR DATA DISCOVERY

FIND, CLASSIFY AND REMEDIATE SENSITIVE DATA

BENEFITS

- Locate and identify sensitive content on endpoints, servers, shares, and databases.
- Visibility into and reporting of sensitive content or data without appropriate controls
- Automatic remediation and removal of sensitive files
- Document data security and privacy compliance

Deploy

Inspect

Remediate

Web, File, Database Servers +more

> DG FOR CLOUD DATA PROTECTION

AUDIT AND PROTECT SENSITIVE DATA IN THE CLOUD STAGE

BENEFITS

- Enable compliant cloud storage adoption
- Visibility into cloud data
 - Administrator
 - Data Owner
- Educate users with real-time prompts
- Audit and remediate

> DG FOR DATA DISCOVERY

MONITOR AND CONTROL REGULATED DATA LEAVING YOUR ENDPOINT

BENEFITS

- Endpoint level data visibility
- Device control
- Educate users with real-time prompts
- Detailed auditing and logging

> WHAT MAKES DIGITAL GUARDIAN UNIQUE

THE INDUSTRY'S MOST ACCURATE TECHNOLOGY FOR IDENTIFYING & CONTROLLING PII & PHI

1

Our unique fingerprinting technology is the industry's most accurate for identifying and controlling PII & PHI. By focusing on protecting PII/PHI, we provide the absolutely lowest false positive rate of any technology available. This allows your team to **focus on the real risks**.

“Within literally minutes of the appliance being plugged in, we started collecting data. Once we saw items that could become major issues for us, we were able to remediate potential problems right away.”

- Steve Scott, Information Security Manager, Saint Charles Health System

SINGLE APPLIANCE APPROACH SIMPLIFIES DEPLOYMENT & MANAGEMENT

2

Digital Guardian's Content Inspection engines combine content inspection, policy creation, and management in one, greatly simplifying deployment and management without sacrificing accuracy or effectiveness. Our approach is recognized for delivering the lowest total cost of ownership with **no dedicated resources required to manage**.

“Implementation is greatly simplified by the single appliance approach, with average deployment times much shorter than other DLP products. Implementations can often be completed in a single day, with only minimal policy tuning required thereafter.”

- Data Loss Prevention Leading Vendors Review, DLP Experts, Jan 2016

3

COMPREHENSIVE COVERAGE - NETWORK, ENDPOINT, DISCOVERY & CLOUD DLP

A complete data loss prevention solution - network, endpoint, discovery, and cloud - all managed from one pane of glass. Unlike others, our **DLP coverage extends to the cloud**, allowing your organization to adopt cloud storage while maintaining the visibility and control you need to comply with HIPAA, PCI and other regulations.

4

FLEXIBLE DEPLOYMENT OPTIONS

Our compliance data protection is delivered as either an on premises or a managed service. Backed by experts with 10+ years of implementation experience, our managed security program provides complete installation, administration, reporting, and semimonthly reviews.

“The Digital Guardian MSP can be an attractive option for organizations that are seeking to outsource some or all of their DLP operations.”

- Gartner, MQ for Enterprise DLP, Feb 2016

ABOUT DIGITAL GUARDIAN

Digital Guardian is the only data aware security platform designed to stop data theft. The Digital Guardian platform performs across traditional endpoints, mobile devices and cloud applications to make it easier to see and stop all threats to sensitive data. For more than 10 years we've enabled data-rich organizations to protect their most

valuable assets with an on-premises deployment or an outsourced managed security program (MSP). Our unique data awareness and transformative endpoint visibility, combined with behavioral threat detection and response, let you protect data without slowing the pace of your business.
